C15 Preamplifier
Thank You
For your decision to own this McIntosh C15 Preamplifier ranks you at the very top among discriminating music listeners. You now have “The Best.” The McIntosh dedication to “Quality,” is assurance that you will receive many years of musical enjoyment from this unit.

Please take a short time to read the information in this manual. We want you to be as familiar as possible with all the features and functions of your new McIntosh C15. This will ensure that you receive all the performance benefits this equipment can offer you, and that it will become a highly valued part of your home entertainment system.

Please Take A Moment
The serial number, purchase date and McIntosh dealer name are important to you for possible insurance claim or future service. The serial number is located on the rear panel of the equipment. The spaces below have been provided for you to record that information:

Serial Number: .................................................................
Purchase Date: ............................................................... 
Dealer Name: .................................................................

Customer Service
If at any time you have questions about your McIntosh C15 Preamplifier, contact your McIntosh dealer. Your dealer is familiar with your McIntosh equipment as well as other brands that may be included in your system and is best qualified to help you.

If it is determined that your C15 is in need of repair, you can return it to your dealer or you can return it to McIntosh Laboratory. Contact the McIntosh Repair Department for assistance at,

McIntosh Laboratory, Inc.
2 Chambers Street
Binghamton, New York 13903
Phone: 607-723-3512
FAX: 607-724-0549

NOTES:
1. Connecting Cables are available from the McIntosh Parts Department:
   Data and Power Control Cable Part No. 170-202
       Six foot, shielded 2 conductor, with 1/8 inch stereo mini phone plugs on each end.
2. For additional connection information, refer to the owner’s manual(s) for any component(s) connected to the C15 Preamplifier.
3. There is a built-in turn on delay which will mute the speaker outputs for approximately two seconds when the preamplifier is turned on.
IMPORTANT SAFETY INSTRUCTIONS!

PLEASE READ THEM BEFORE OPERATING THIS EQUIPMENT.

WARNING SHOCK HAZARD - DO NOT OPEN.
The lightning flash with arrowhead, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

AVIS RISQUE DE CHOC - NE PAS OUVRIR.
The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED PERSONNEL
To prevent the risk of electric shock, do not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified personnel.

General:
1. Read all the safety and operating instructions, contained in this owner’s manual, before operating this equipment.
2. Retain this owner’s manual for future reference about safety and operating instructions.
3. Adhere to all warnings and operating instructions.
4. Follow all operating and use instructions.
5. Warning: To reduce risk of fire or electrical shock, do not expose this equipment to rain or moisture. This unit is capable of producing high sound pressure levels. Continued exposure to high sound pressure levels can cause permanent hearing impairment or loss. User caution is advised and ear protection is recommended when playing at high volumes.
6. Caution: to prevent electrical shock do not use this (polarized) plug with an extension cord, receptacle or other outlet unless the blades can be fully inserted to prevent blade exposure.

Attention: pour prevenir les chocs electriques pas utiliser cette fiche polarisee avec un prolongateur, une prise de courant ou un autre sortie de courant, sauf si les lames peuvent etre inserees a fond ans en laisser aucune partie a decouvert.

7. For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning or power line surges.
8. Do not use attachments not recommended in this owner’s manual as they may cause hazards.

Installation:
9. Locate the equipment for proper ventilation. For example, the equipment should not be placed on a bed, sofa, rug, or similar surface that may block ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet, that may impede the flow of air through the ventilation openings.
10. Locate the equipment away from heat sources such as radiators, heat registers, stoves, or other appliance (including amplifiers) that produce heat.
11. Mount the equipment in a wall or cabinet only as described in this owner’s manual
12. Do not use this equipment near water; for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement or near a swimming pool, etc.
13. Do not place this product on an unstable cart, stand, tripod, bracket, or table. The equipment may fall, causing serious injury to a person, and serious damage to the product.

Connection:
14. Connect this equipment only to the type of AC power source as marked on the unit.
15. Route AC power cords so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the instrument.
16. Do not defeat the inherent design features of the polarized plug. Non-polarized line cord adapters will defeat the safety provided by the polarized AC plug. If the plug should fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding-type plug.
Introduction
The C15 Remote Controlled Preamplifier is a simple but elegant instrument that allows you to enjoy outstanding music reproduction. It includes a wide range of convenient operating functions to enhance your listening experience. The classic McIntosh C15 will perfectly complement a McIntosh stereo power amplifier for a stereo system of incomparable performance and style.

Performance Features
- **Multiple Inputs**
Six high level inputs and one Moving Magnet phono input provide for all popular program sources.

- **Tone Control Bypass**
At the flat settings the Bass and Treble control circuit elements are removed from the signal path.

- **Loudness Circuity**
A push-button Loud switch adds loudness compensation to the volume control for improved bass response at low level listening.

- **Electronic Input Switching**
Digital Logic integrated circuits drive Electromagnetic switches on all inputs and operating functions for reliable, noiseless, distortion free switching

- **Output and Speaker Switching**
Front panel Output push-buttons control two switched outputs that allow you to send signals to two separate power amplifiers.

- **Front Panel Headphone Jack**
A convenient headphone jack allows the convenience of private listening when the main outputs to the power amplifier are muted.

- **Special Power Supply**
Fully regulated power supply with double shielded power transformer ensures stable noise free operation even though the power line should vary.
Installation

The C15 can be placed upright on a table or shelf, standing on its four feet. It also can be custom installed in a piece of furniture or cabinet of your choice. The required panel cut-out, ventilation cutout and unit dimensions are shown.

Always provide adequate ventilation for your C15. Cool operation ensures the longest possible operating life for any electronic instrument. Do not install the C15 directly above a heat generating component such as a high powered amplifier. If all the components are installed in a single cabinet, a quiet running ventilation fan can be a definite asset in maintaining all the system components at the coolest possible operating temperature.

A custom cabinet installation should provide the following minimum spacing dimensions for cool operation. Allow at least 1-1/2 inches (3.8cm) above the unit so airflow is not obstructed. Allow 17-1/2 inches (44.5cm) depth behind the mounting panel, which includes clearance for connectors. Allow 1-1/8 inches (2.9cm) in front of the mounting panel for knob clearance. Be sure to cut out a ventilation hole in the mounting shelf according to the dimensions in the drawing.
Connect the C15 power cord to a live AC outlet. Refer to information on the back panel to determine the correct voltage.

- **DATA PORTs** send signals to compatible source components to allow you to remote control them.
- **OUTPUTS 1 and 2** the signal output controlled by the front panel OUTPUTS push-buttons.
- **TAPE inputs** are for tape recorders.
- **PH (Phono)/AUX INPUTS** accept signals from a Moving Magnet phono cartridge or an audio high level signal, depending on the position of the PH/AUX Switch.
- **GND terminal** accepts a ground wire from a turntable.
- **POWER CONTROL Outputs** send turn-on signal to a McIntosh Component.
- **The EXT (external) Sensor** for a McIntosh Keypad or IR sensor.
- **The SUM Data Port connector** accepts a control cable from a McIntosh Remote Control Translator.
- **TAPE OUTPUTS** supply record signals for tape recorders.
- **VIDEO inputs** for audio signals from a LD, VCR, TV or the optional MVS-3 A/V Selector.
- **The HOME Data Port** is for use with the optional HC-1 Home Controller.
- **PROCESSOR IN/OUT Switch** turns the signal processor loop On or Off.
- **CD1 and CD2 inputs** accept signals from separate CD players.
- **PROCESSOR FROM and TO jacks** for a signal processor.
- **TUNER inputs** accept signals from the output of a tuner.
How to Connect the C15

1. Connect the C15 power cord to a live AC outlet.
2. Connect cables from OUTPUTS 1 or 2 to the power amplifier inputs.
3. Connect cables from a signal processor output to the C15 PROCESSOR FROM jacks, and the signal processor input jacks to the C15 PROCESSOR TO jacks.

   NOTE: When a signal processor is connected and the C15 IN-OUT PROCESSOR Switch is set to the IN position, the processor must be on, or in bypass mode, for a signal to pass through the preamplifier.

4. Connect cables from the TAPE OUTPUTS to the record inputs of the tape recorder and the TAPE INPUTS to the tape recorder outputs.
5. Connect the ground wire from a turntable or record player to the GND terminal.

6. Connect cables from a record player with a moving magnet cartridge to the PH/AUX INPUTS when the PH-AUX switch is in the PH position, or from an auxiliary source component when the PH-AUX switch is in the AUX position.
7. Connect cables from a McIntosh CD Player to the C15 CD1 or CD2 INPUT jacks.
8. Connect cables from a McIntosh tuner output to the C15 TUNER INPUTS.
9. Connect a cable from the C15 POWER CONTROL mini phone jack to the Power Control In on a McIntosh Power Amplifier or component.
10. Connect a cable(s) from the DATA PORT(S) to a product that is to be controlled by the C15.
How to Connect the C15 for Video Switching

1. Connect a Data cable from the C15 VIDEO DATA PORT to the MVS-3 DATA IN jack.
2. Connect the MVS-3 CONTROL CENTER AUDIO OUTPUTS to the C15 VIDEO INPUTS.
3. Connect the MVS-3 VIDEO MONITOR OUTPUT to a TV or Monitor.
4. Connect a McIntosh LD Player Audio Outputs to the MVS-3 LV AUDIO INPUTS, the Video output to the MVS-3 VIDEO INPUT and the Control Out to the MVS-3 DATA OUTPUT jack.
5. Connect other video source components to the appropriate audio and video and data jacks on the MVS-3.
C15 Front Panel Controls, Push-Buttons and Switches

TREBLE control provides 12dB boost or cut with a flat center position

BASS control provides 12dB boost or cut with a flat center position

MONO push-button combines the left and right channel signals for Mono operation at Outputs 1 and 2. The Record outputs are not affected by this switch.

POWER switch turns all AC power completely ON or OFF

The BALANCE control allows you to adjust the relative volume balance between channels

VOLUME control allows you to adjust the listening level. The Record outputs are not affected by the Volume control

LOUDNESS provides frequency response contoured to compensate for the behavior of the human ear at softer listening levels

Select any one of the six Audio signal sources

OUTPUT 1 and 2 push-buttons turn the 1 and 2 outputs On or Off

IR Sensor receives commands from a remote control

HEADPHONES jack allows connection of Stereo Headphones for private listening

MUTE push-button mutes audio in the Outputs 1 and 2, headphones output is not affected

STANDBY/ON push-button turns the C15 ON, or OFF (Standby)
How to Operate the C15

Power On
Press the POWER switch to ON. The Red LED above the STANDBY/ON push-button lights to indicate the C15 is in Standby mode. To turn on the C15 press the STANDBY/ON push-button. The MUTE LED will light for approximately two seconds after turn on. Refer to Figure 1.

Note: You may also turn on the C15 using the HR033 Remote Control.

Source Selection
Select the desired listening source with the appropriate push-button switch. If an MVS-3 Audio/Video Selector is connected, use the HR033 Remote to first select Video and then any of the A/V sources connected to the MVS-3. Refer to Figure 2.

Volume Control
Adjust the VOLUME control for the desired listening level.

Balance Control
Adjust the BALANCE control as needed to achieve approximately equal listening volume levels in each loudspeaker. Turn the BALANCE to the Left to emphasize the left channel by reducing the level of the right channel. Turn the BALANCE to the right to emphasize the right channel by reducing the level of the left channel.

Bass and Treble Controls
Adjust the BASS and TREBLE controls to suit your listening preferences. The bass or treble intensity can be increased with clockwise rotation and decreased with counterclockwise rotation. All tone control circuit elements are removed from the signal path when the controls are in the center or flat position.

Mono
Press the MONO push-button to combine left and right stereo signals to mono at the OUTPUTS 1 and 2 and HEADPHONES output.

Mute
Press the MUTE push-button to mute audio in all outputs except the HEADPHONES. The MUTE LED above the push-button will flash on and off to indicate that Mute is active. Press MUTE a second time to unmute audio.

PH/AUX Inputs
When using a phono player with a moving magnet cartridge connected to the PH/AUX inputs, set the PH-AUX switch to the PH position. When using an auxiliary program source component connected to the PH/AUX inputs, set the PH-AUX switch to the AUX position. Refer to Figure 3.

Loud Switch
Press the LOUD push-button to add loudness bass compensation to the volume control for improved low level listening.

Output 1 and 2
Press OUTPUT 1 or 2 push-buttons to send audio to separate power amplifiers connected to the rear panel OUTPUTS 1 or 2. You can press either push-button individually or both together. Refer to Figure 4.
Headphones Jack
Connect a pair of dynamic headphones to the Headphones jack for private listening. Press Mute to mute all other outputs including the amplifier connected to the loudspeakers. Refer to Figure 4.

Reset of Microprocessors
In the event that the controls of the C15 stop functioning push the POWER switch OFF and wait about two minutes, then push the POWER switch ON followed by pushing the STANDBY/ON push button. This will reset the C15 microprocessors and the Preamplifier should be functioning normally.

NOTE: The above condition is usually caused by either interruptions in AC power and/or major changes that may occur in AC power line voltage.

Using a Signal Processor
When a signal processor is connected, set the rear panel PROCESSOR switch to the IN position. Refer to Figure 5.

NOTE: When a signal processor is connected and the C15 PROCESSOR Switch is set to the IN position, the processor must be on, or in bypass mode, for a signal to pass through the preamplifier.

How To Make A Tape Recording
1. Select the source signal you wish to record with the appropriate front panel input push-button. If you wish to record from an Audio/Video source connected to the optional MVS-3 Audio/Video Selector, using the HR033 Remote, first select Video and then the desired source connected to the MVS-3. Refer to Figure 6.
2. Adjust the record level using the tape recorder volume control and proceed with the recording process.
3. To listen to the tape playback of the program source just recorded, press the TAPE input push-button. Refer to Figure 6.

NOTE: The C15 TAPE OUTPUTS are not affected by the VOLUME or BALANCE controls.
Select any of the six audio sources high level, (or phono), input.

Use to select tuner presets or any numbered operation.

Select FM tuner operating functions.

Tunes to the next radio station.

Select CD player, CD changer or tape recorder functions.

Select Switched Outputs 1 and 2

Mutes the audio

Adjusts the volume level up or down

Press to turn the entire C15 system off

Press to turn the C15 ON or OFF

Turns power ON to a component connected via the Data Port.

Select AM tuner operating functions

Selects tuner stations presets and certain McIntosh CD Players

Selects any one of five externally switched Audio/Video Program Sources

Press to operate the optional McIntosh Home Controller

Note: The HR033 Remote Control push-buttons that are shown in black only work with other McIntosh Control Centers.
How to Operate HR033

Mute
Press the MUTE push-button to mute audio at the OUTPUTS 1 and 2. The TAPE OUTPUTS and HEADPHONES output are not affected by the MUTE function. The MUTE LED above the push-button will flash on and off to indicate that Mute is active. Press MUTE a second time to unmute audio.

Mono
Press the MONO push-button to combine left and right stereo signals to mono at OUTPUTS 1, 2 and HEADPHONES Outputs.

Input Source Selection
Press any of the six input push-buttons to select a program source.

Video/Audio Selection
When the optional McIntosh MVS Audio/Video Selector is added, first press VIDEO, and then the desired push-button to select any of the five A/V sources connected to the MVS.

CD/Tape
Use these push-buttons to operate a CD player, CD changer or tape recorder, when the component is connected to the C15 with a McIntosh RCT Translator.

Numbered Push-buttons
Press push-buttons 0 through 9 to access tuner station presets, CD tracks/discs, or operate a McIntosh Home Controller.

Disc and Track
Use the DISC and TRACK push-buttons when a CD player or changer is being used.

Tuner Push-buttons
Use with a McIntosh tuner. Select AM or FM broadcast band. Press and release SEEK Up or Down to move from station to station. Press and hold a SEEK push-button to move continuously from station to station. Press REVIEW to start the automatic brief audition of each of the presets stored in the tuner memory. Press REVIEW a second time to stop on a station preset and exit the Review process.

Volume
Press the Up or Down VOLUME push-button to raise or lower the listening volume level. The TAPE OUTPUTS are not affected by volume changes.

Amplifier Selection
Press OUTPUT 1 or 2 push-buttons either separately or together, to control the rear panel OUTPUTS 1 and 2 which can feed signals to a power amplifier or other accessory component.

Home
When the optional HC-1 Home Controller is added to the C15 system, press the SV/HM (Home) push-button to select the HC-1. Within 5 seconds press one of the numbered push-buttons to activate a desired relay in the HC-1.

Acc On
Press ACC ON to turn power ON of a McIntosh LV or DVD Disc Player.

NOTE: When other brands of components are connected with a McIntosh Remote Control Translator (RCT), refer to the RCT Owner’s Manual for further information on alternate HR033 push-button functions.
### Specifications

**Frequency Response**  
+0, -0.5dB from 20Hz to 20,000Hz

**Total Harmonic Distortion**  
0.002% From 20Hz to 20,000Hz

**Signal To Noise Ratio**  
Phono, 90dB below a 10mV input, (84db IHF)  
High Level, 105dB below rated output, (95db IHF)

**Maximum Voltage Output**  
Phono, 90mV  
High Level, 10V

**Output Impedance**  
600 ohms

**Sensitivity**  
Phono, 2.5mV for 2.5V rated output (0.5mV IHF)  
High Level, 250mV for 2.5V rated output (50mV IHF)

**Input Impedance**  
Phono, 47K ohms, 65pF  
High Level, 22K ohms

**Maximum Input Signal**  
Phono, 90mV  
High Level, 10V

**Tone Controls**  
Bass Control ± 12dB @20Hz  
Treble Control ± 12dB @20kHz

**Power Requirements**  
100 Volts, 50/60Hz at 25 watts.  
110 Volts, 50/60Hz at 25 watts.  
120 Volts, 50/60Hz at 25 watts.  
220 Volts, 50/60Hz at 25 watts.  
230 Volts, 50/60Hz at 25 watts.  
240 Volts, 50/60Hz at 25 watts.

*NOTE: Refer to the rear panel of the C15 for the correct voltage*

---

**Dimensions**  
17-1/2” (44.5cm) W, 5-3/8” (13.7cm) H, 17-1/2” (44.5cm) D, (including clearance for connectors)

**Weight**  
14.5 pounds ( 6.6 Kg) net, 29.5 pounds (13.4 Kg) in shipping carton
Packing Instructions

In the event it is necessary to repack the equipment for shipment, the equipment must be packed exactly as shown below. It is very important that the four plastic feet are attached to the bottom of the equipment. This will ensure the proper equipment location on the bottom pad. Failure to do this will result in shipping damage.

Use the original shipping carton and interior parts only if they are all in good serviceable condition. If a shipping carton or any of the interior part(s) are needed, please call or write Customer Service Department of McIntosh Laboratory. Please see the Part List for the correct part numbers.
