MVP891
Audio Video Player
Owner’s Manual
The lightning flash with arrowhead, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

**WARNING - TO REDUCE RISK OF FIRE OR ELECTRICAL SHOCK, DO NOT EXPOSE THIS EQUIPMENT TO RAIN OR MOISTURE.**

**CAUTION** - Invisible Laser Radiation when open. DO NOT stare into the beam or view directly with optical instruments. Use of controls or adjustments or performance of procedures other than those specified in the Owners Manual may result in Hazardous Radiation Exposure.

**LUOKAN 1 LASERLAITE**
**KLASS 1 LASER APPARAT**

**VAROITUS!** Laitteen käyttäminen muulla kuin tassa käyttöohjeessa mainituilla tavalla saattaa altistaa käyttäjän turvallisuusluokan 1 ylittäville nakymattomalle lasersateille.

**WARNING!** Om apparaten används på annat sätt än i denna bruksanvisning specificerats, kan användaren utsättas för osynlig lasersträning, som överskrider gransen för laserklass 1.

This product incorporates an embedded CLASS 3R Laser (IEC60825-1).

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**To prevent the risk of electric shock, do not remove cover or back. No user-serviceable parts inside.**
1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with a dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. Do not expose this equipment to dripping or splashing and ensure that no objects filled with liquids, such as vases, are placed on the equipment.
16. To completely disconnect this equipment from the a.c. mains, disconnect the power supply cord plug from the a.c. receptacle.
17. The mains plug of the power supply cord shall remain readily operable.
18. Do not expose batteries to excessive heat such as sunshine, fire or the like.
19. Connect mains power supply cord only to a mains socket outlet with a protective earthing connection.
20. **Warning:** The Ethernet connector of this equipment must not be directly connected to a public network. Connection is to be made only by way of a modem or router approved for this purpose.
**Trademark and License Information**

The McIntosh MVP891 incorporates copyright protection technology that is protected by U.S. patents and other intellectual property rights. This item incorporates copy protection technology that is protected by U.S. patents and other intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are prohibited. The MVP891 uses the following Technologies:

Thank You

Your decision to own this McIntosh MVP891 Audio Video Player ranks you at the very top among discriminating music listeners. You now have “The Best.” The McIntosh dedication to “Quality,” is assurance that you will receive many years of visual and musical enjoyment from this unit.

Please take a short time to read the information in this manual. We want you to be as familiar as possible with all the features and functions of your new McIntosh.

Please Take A Moment

The serial number, purchase date and McIntosh Dealer name are important to you for possible insurance claim or future service. The spaces below have been provided for you to record that information:

Serial Number: ____________________________

Purchase Date: ____________________________

Dealer Name: ______________________________

Technical Assistance

If at any time you have questions about your McIntosh product, contact your McIntosh Dealer who is familiar with your McIntosh equipment and any other brands that may be part of your system. If you or your Dealer wish additional help concerning a suspected problem, you can receive technical assistance for all McIntosh products at:

McIntosh Laboratory, Inc.
2 Chambers Street
Binghamton, New York 13903

General Information

1. For additional connection information, refer to the owner’s manual(s) for any component(s) connected to the MVP891 Audio Video Player.
2. When the MVP891 HDMI Output is connected to a TV/Monitor there is no signal present at the Component Video Output Jacks, unless the HDMI resolution is set to 480i.
3. The Super Audio Compact Discs (SACD) Audio Signals are converted internally from Digital to Analog.
4. When the MVP891 is playing back a SACD Disc the DSD Signal from the disc is converted to a PCM Signal and is available at the HDMI Out Connection.
5. A PCM version of the decoded MP3 Signal is available at the Digital Audio Outputs.
6. The MVP891 has built-in 192kHz 32-Bit DACs (Digital to Analog Converter) to allow playing of Discs recorded with a higher bit and sample rate, by using the Analog Audio Outputs.
7. Some Multichannel BD (Blu-ray), DVD, DVD-Video, DVD-Audio and Super Audio Compact Discs might contain Low Frequency Audio Signals (below 80Hz) in the Center and/or Surround Channels. If the Loudspeakers in your Sound System are not capable of reproducing those Low Frequencies, distortion and/or possible damage to the Loudspeakers may occur. For additional information, consult with your Dealer or refer to the Owner’s Manual for your Loudspeakers.
8. The DVD-Audio and Super Audio Compact Discs Digital Audio Signal is available via the HDMI Output. The MVP891 also internally decodes the Digital Audio from DVD-Audio and Super Audio Compact Disc and the Eight Channel Analog Signals are available at the UNBALANCED AUDIO OUTPUTS (7.1CH).
9. The MVP891 is designed to playback 3D Blu-ray Discs. The 3D Digital Video Signal from the MVP891 is available at the HDMI Out connector. It is extremely important for all A/V Components and the HDMI cables used for connections between the MVP891 and the TV/Monitor, meet or exceed the HDMI High Speed Standards for proper 3D Video Playback.
10. HDMI Cable lengths between MVP891 and the Audio/Video Control Center should not exceed 25ft (8.3meters). If there is need to use HDMI Cables longer than 25ft (8.3meters), a high quality in-line HDMI Buffer/Converter would be required for reliable digital signal transmission via the HDMI Connections.
11. The MVP891 basic transport functions may also be controlled by using other McIntosh Remote Controls or Keypads thru a McIntosh Control Center or Preamplifier. Refer to the owner’s manual(s) supplied with those component(s) for additional operation information.
12. PCM (Pulse Code Modulation) is the name given to a specific type of Digital Audio Signal. The CD Audio Disc and the supplemental audio track found on some Blu-ray Discs use the PCM format.
13. Sound Intensity is measured in units called Decibels and “dB” is the abbreviation.
14. When discarding the unit, comply with local rules or regulations. Batteries should never be thrown away or incinerated but disposed of in accordance with the local regulations concerning battery disposal.
15. For additional information on the MVP891 and other McIntosh Products please visit the McIntosh Web Site at www.mcintoshlabs.com.

USB Memory Drive Information

The MVP891 has a Front Panel Slot for accepting USB Memory Drives only. The USB Memory Drive is used in BD-Live and Bonus View Mode when the storage requirements exceeds the internal memory. The USB Drive provides the memory storage needed for the additional program content which is downloaded from the Movie Studio/Record Company via the MVP891 internet connection. It may also be used for playback of Audio and Video Files.

1. Before switching On the MVP891 insert the USB Memory Drive into the Front Panel Slot.
2. Do not remove the USB Memory Drive until the MVP891 has been switched Off. Removing the USB Memory Drive while the MVP891 is On could result in malfunction or loss of the USB Memory Drive’s data.
3. USB Memory Drives need to have a storage capacity of 1GB (Gigabit) or greater.
4. Before using the USB Memory Drive for storage in the MVP891, it first must be formatted on a computer using the FAT32 File System.
5. The MVP891 will display Photos using the JPEG File Format.
6. The MVP891 will playback music files such as MP3, WMA and AAC.
7. Read and follow all instructions provided by the USB Memory Drive manufacturer to prevent damage to the Drive and to the files contained on the Drive.
Disc Information

1. Compact Discs that are not round (e.g. Novelty discs with octagonal or heart shapes) will not play properly in the MVP891 and should not be tried, as possible damage may occur.
2. The MVP891 Audio Video Player is designed to play all standard CD Audio Discs that conform to the Official Compact Disc Standards which is indicated by the Symbol .
3. The MVP891 will play most of the following discs, however some recorded discs may not be able to play due to the condition of the recording: BD-Video, BD-3D Video, Super Audio CD (SACD), CD-R, CD-RW, Picture CD (Kodak), Fujicolor CD, WMA(Windows), DVD-Audio, DVD-Video, DVD-R, DVD+R, DVD-RW, DVD+RW, and DVD-AVCHD.
4. CD Audio Discs recorded in the MP3, WMA, AAC or LPCM Format will playback on the MVP891 except discs that contain multi-session recordings.
5. The MVP891 will display Photos in the JPEG File Format from a Disc.
6. The CD audio side of the Dual Disc does not meet the Compact Disc Digital Audio specifications found in the industry “Redbook”; the MVP891 may not read the CD side of a Dual Disc.
7. Several of the DVD, DVD-Audio and SACD performance features available on the MVP891 are active only if the Disc includes the supporting encoded information.
8. BD-Video and DVD-Video Discs are designed to only play in certain region(s) of the world. A region may be a single country or a group of countries. Usually on the back cover of the Video Disc container is a Symbol with either a “Character” or “Number(s)” or the word “All” inside it. The MVP891 is designed to play discs for Regions “A”, “I” and “All”.
9. Certain Dolby Digital and DTS Encoded Discs display their own unique Audio Mode Selection menu, every time the disc is loaded into the player. If you do not make a choice from this menu, the disc will revert to its default Audio Mode when play is started.

Connector and Cable Information

XLR Connectors
Below is the Pin configuration for the XLR Balanced Output Connectors on the MVP891. Refer to the diagram for connection:
- PIN 1: Shield/Ground
- PIN 2: + Output
- PIN 3: - Output

Power Control Connector
The MVP891 Power Control Input/Output Jacks receive/send Power On/Off Signals when connected to other McIntosh Components. A 1/8 inch stereo mini phone plug is used for connection to the Power Control Input/Output on the MVP891.

Data and IR Input Port Connectors
The MVP891 Data In Port receives Remote Control Signals. A 1/8 inch stereo mini phone plug is used for connection. The IR Ports also use a 1/8 inch stereo mini phone plug and allow the connection of other brand IR Receivers to the MVP891.

RS232 DB9 Connector Pin Layout

2. Data Out (TXD)
3. Data In (RXD)
4. N/C
5. Gnd.
Introduction and Performance Features

Introduction

The McIntosh MVP891 Audio Video Player offers the latest in audio/video technology, providing state of the art reproduction of digital video and audio program sources. A full complement of performance features allows for the enjoyment of 3D Blu-ray, Blu-ray, DVD, SACD, DVD-Audio and Audio CD discs. Special Audio and Video formats are also reproduced with flawless realism. The advanced mechanical design of the transport ensures many years of smooth trouble free operation.

Performance Features

• Advanced Video Circuitry
  The MVP891 uses the Anchor Bay Technologies VRS ultra performance ABT-2015 processor. The Analog Devices 12-bit/297MHz video D/A provides conversion with Noise Shaped Video processing, Digital Noise Reduction and 14/12Bit Digital to Analog Video Conversion for High Definition and Standard Definition Signals.

• 32 Bit Audio DAC
  The MVP891 has five two channel Digital to Analog Converters capable of sampling rates up to 192kHz with 32 Bits of resolution.

• Advanced Transport
  The MVP891 has a new vibration-resistant transport with an advanced digital servo for faster, quieter and accurate operation. The Video Disc Data is read into memory from the disc at twice the normal rate. Likewise, CD Audio Data is read into memory at four times the normal rate. The fast read speeds help to insure better disc tracking and error correction processing.

• 1080p/24frame Video Output
  The MVP891 has the highest video resolution available, 1080p/24frames per second image quality via the HDMI Video Output.

• Video Outputs
  Along with the HDMI Video Output the MVP891 also has Component Video and Composite Video Outputs for a variety of applications.

• Power Control
  The Power Control Input connection provides convenient Turn-On/Off of the MVP891 when connected to a McIntosh System with Power Control.

• Remote Control
  The Remote Control with illuminated push-buttons, provides control of the MVP891 operating functions. A Data Port Connection to a McIntosh A/V Control Center or Preamplifier allows for convenient system operation using one Remote Control. An External IR Sensor Input allows for remote operation when the MVP891 is located behind closed doors.

• Special Power Supply
  A fully regulated Power Supply, with a special R-Core Power Transformer, ensures stable noise free operation even though the power line varies.

• Extruded Side Panels
  The sides of the MVP891 are extruded aluminum panels with a bead blast textured surface and a black anodized finish.

• Fiber Optic Solid State Front Panel Illumination
  The Illumination of the Glass Front Panel is accomplished by the combination of custom designed Fiber Optic Light Diffusers and extra long life Light Emitting Diodes (LEDs). This provides even Front Panel Illumination and is designed to ensure the pristine beauty of the MVP891 will be retained for many years.
### Dimensions

The following dimensions can assist in determining the best location for your MVP891. There is additional information on the next page pertaining to installing the MVP891 into cabinets.

Installation

The MVP891 can be placed upright on a table or shelf, standing on its four feet. It also can be custom installed in a piece of furniture or cabinet of your choice. The four feet may be removed from the bottom of the MVP891 when it is custom installed as outlined below. The four feet together with the mounting screws should be retained for possible future use if the MVP891 is removed from the custom installation and used free standing. The required panel cutout, ventilation cutout and unit dimensions are shown.

Always provide adequate ventilation for your MVP891. Cool operation ensures the longest possible operating life for any electronic instrument. Do not install the MVP891 directly above a heat generating component such as a high powered amplifier. If all the components are installed in a single cabinet, a quiet running ventilation fan can be a definite asset in maintaining all the system components at the coolest possible operating temperature.

A custom cabinet installation should provide the following minimum spacing dimensions for cool operation.

Allow at least 6 inches (15.24cm) above the top, 2 inches (5.08cm) below the bottom, 3 inches (7.62cm) behind the rear panel and 2 inch (5.08cm) on each side of the Audio Video Player, so that airflow is not obstructed. **Do not block the ventilation holes on the top and bottom cover; also do not block the rear panel fan opening.** Allow 1 inch (2.54 cm) in front of the mounting panel for clearance. When the DISC Tray is opened, the panel clearance required in front of mounting panel is 6-3/4 inches (17.2cm). **Be sure to cut out a ventilation hole in the mounting shelf according to the dimensions in the drawing.**
Connect the MVP891 power cord to a live AC outlet. Refer to information on the back panel of your MVP891 to determine the correct voltage for your unit.

**POWER CONTROL IN**
receives turn-on signals from a McIntosh component and
**POWER CONTROL OUT**
sends turn-on signals on to another McIntosh Component.

**DATA IN**
receives operating data from a McIntosh Control Center.

**DATA IN** for connecting an IR Receiver.

**IR IN** puts for connecting an IR Receiver.

**RS-232C connector**
for connection to a remote control device.

**HDMI OUT** supplies digital video and digital audio signals to an Input of an A/V Control Center or other audio/video component.

**UNBALANCED AUDIO OUTPUTS**
supply Seven Point One Channels of analog audio and connects to the 7.1 CH Input of an A/V Control Center.

**UNBALANCED AUDIO OUTPUTS**
supply Two Channels of Analog Audio and connects to the Analog Input of an A/V Control Center.

**UNBALANCED AUDIO OUTPUTS**
supply Two Channels of Analog Audio and connect to the Balanced Inputs of other components.

**UNBALANCED AUDIO OUTPUTS**
supply Two Channels of Analog Audio and connect to the Balanced Inputs of other components.

**ETHERNET**
Network Connector for connecting the MVP891 to a Broadband Ethernet Network.

**COAXIAL DIGITAL AUDIO OUTPUT**
sends signals to a Control Center with a D/A Converter or a decoder.

**VIDEO OUTPUT**
supplies video signals to connect to a Composite Input of an A/V Control Center or other video component.

**BALANCED AUDIO OUTPUTS**
supply two channels of analog audio to connect to Balanced Inputs of other components.

**ETHERNET**
Network Connector for connecting the MVP891 to a Broadband Ethernet Network.

**P_L/C_L OUTPUT**
connects to the P_L/C_L Component Input of the TV/Monitor or other video component.

**P_R/C_R OUTPUT**
connects to the P_R/C_R Component Input of the TV/Monitor or other video component.
Making Connections

The MVP891 has the ability to be remotely switched On/Off from a McIntosh Preamplifier or A/V Control Center via the Power Control connection. The MVP891 Data Port Connection allows for the remote operation of basic functions using the A/V Control Center Remote Control. With an external sensor connected to the MVP891, remote control operation is possible from another room and/or when the MVP891 is located in a cabinet with the doors closed.

The connection instructions below, together with the MVP891 Connection Diagram located on the separate folded sheet “Mc1A”, is an example of an audio/video system. Your system may vary from this, however the actual components would be connected in a similar manner. For additional information refer to “Connector and Cable Information” on page 7.

Power Control Connections:
1. Connect a Control Cable from the A/V Control Center PC (Power Control/Trigger) Jack to the POWER CONTROL IN Jack on the McIntosh MVP891 Audio/Video Player.
2. Optionally, connect a Control Cable from the MVP891 Audio Video Player POWER CONTROL OUT Jack to the next McIntosh Component Power Control In Jack.
3. Connect any additional components in a similar manner, as outlined in step 2.

Data Control Connections:
4. Connect a Control Cable from the A/V Control Center Data Out 1 Jack to the McIntosh MVP891 Audio Video Player DATA IN Jack.

Sensor Connections:
5. Optionally, connect an external Sensor to the McIntosh MVP891 Audio Video Player IR IN Jack.

HDMI Connections:
6. Connect a HDMI Cable from the McIntosh MVP891 Audio Video Player HDMI OUT to the HDMI Input 1 BD on the A/V Control Center.

Digital Audio Connections:
7. Connect a Cable from the McIntosh MVP891 Audio Video Player DIGITAL OUT COAXIAL to the Coaxial In 1 on the A/V Control Center.

Analog Audio Connections:
8. Connect Balanced Cables from the McIntosh MVP891 Audio Video Player AUDIO OUTPUTS BALANCED 2CH Connectors to the A/V Control Center AUX Balanced Input 1 connectors.
9. Connect Audio Cables from the MVP891 Audio Video Player UNBALANCED AUDIO OUTPUTS 10.1CH (all eight channels) Jacks to the A/V Control Center 7.1 CH Input Jacks.
10. Connect Cables from the McIntosh MVP891 Audio Video Player AUDIO OUTPUTS UNBALANCED 2CH Jacks to the A/V Control Center CD Input Jacks.

Analog Video Connections:
11. Connect Cables from the McIntosh MVP891 Audio/Video Player COMPONENT VIDEO OUT to the A/V Control Center Component Video In 2 (DVD) Inputs.
12. Connect a Cable from the McIntosh MVP891 Audio Video Player VIDEO OUT to the A/V Control Center Video In DVD Input.

Ethernet Connection:
13. Connect a CAT5 or CAT6 cable from the MVP891 ETHERNET connector to a Computer Network with router providing High Speed Broadband Internet Access or directly to a High Speed Modem with Broadband Internet Access.

Note: For proper operation of the BD-Live feature a High Speed Internet connection is required.

AC Power Cords Connections:
14. Connect the McIntosh MVP891 Audio Video Player AC Power Cord to a live AC outlet.
Remote Control Push-Buttons

Select a different picture Angle
Press for random playback of tracks from Video and Audio CDs
Move backward to the previous chapter or track, also use to set the Still Video Image step rate
Starts Playback of a disc
Moves backward in time through a chapter or track rapidly
Use to quick stop or full stop
Use to pause the disc playback. Also use to activate the Still Image Video Mode
Access the on-screen Disc Menu from a DVD disc and the Media Player Edit Menu (“Pop Up” On-Screen Push-button)
Press to select between various on-screen pages of information on DVD-Audio Discs
Press PAGE (−) to activate the Home On-Screen Menu
Return to the previous setup menu screen
Use to select various disc information including time. It is displayed on-screen and on the Front Panel Alphanumeric display
Use to access menu items on some Blu-Ray Discs
Use to Clear the last programmed track
Use to view and/or change the on-screen subtitle language
Use to select one of various repeat modes
Selects the video signal output at the HDMI Output
Use to set a starting and ending time segment on a disc for continuous repeat play
Use to switch power On to the MVP891
Use to change the brightness of the Front Panel Alphanumeric Display from bright to off
Use to switch power Off to the MVP891
Use to access the standard or one of five preset user defined video settings
Move forward to the next chapter or track, also use to set the Still Video Image step rate
Moves forwards in time through a chapter or track rapidly
Selects the SACD or CD Audio Layer from a hybrid disc
Access the on-screen Top Menu from the disc (disc dependent)
Use to move the on-screen cursor up, down, left, right; also use to select the highlighted on-screen menu item
Use to access the Setup Menu
Used to activate an on-screen menu to perform various Audio and Video functions
Access any numbered operating function
To access Track Numbers on CDs and DVD-Audio Discs greater than 10
Use to view on-screen the current title, chapter, group or track number along with direct access to change it using the number push-buttons
Use to view or change the current Audio Selection
Use to preselect (program) from an audio disc the desired tracks for playback
Selects the video signal output resolution at the HDMI Output
Use to review the preselected tracks from the disc on the Front Panel Alphanumeric display, while in the program mode

Note: Push-buttons whose function is not identified above are for use with other McIntosh Components
How to use the Remote Control

The Remote Control is capable of performing both basic Operating Functions and Setup Options for the MVP891 Audio Video Disc Player.

Notes: Refer to the “How to Operate” and “How to Operate Setup Mode” Sections of this manual for additional information using this Remote Control.

Play
With a disc loaded, press the PLAY▷ Push-button to start the disc playing.

Stop
Press the STOP■ Push-button once to stop disc playback. Press PLAY and the disc will start playing again from the disc time where Stop was pressed. Press STOP■ twice for a complete stop and return to the beginning of a disc.

Numbered Push-buttons
Press 1 through 9 to directly access one of the first nine Disc Tracks/Chapters using the On-screen Icon. For track numbers greater than 10, press the +10 Push-button first and then the required number. For example to access Disc Track/Chapter 23, press +10 twice and then 3.

Clear
Press the CLEAR Push-button to erase a selected track or incorrect setting.

Pause
Press the PAUSE■ Push-button to temporarily stop disc playback at any time. When a DVD is playing, each additional time the Pause Push-button is pressed, the player will proceed to the next Still Video Image.

Note: The Still Video Image step rate may be changed by using the ◀ (Reverse) or ▶ (Fast Forward) Push-button.

Back and Next
Press the ▶ (Next) Push-button to move forward or the ◀ (Back) Push-button to move backward one chapter/track at a time on the disc.

Return
Press the RETURN Push-button to return to the previous setup menu.

Setup
Press the SETUP Push-button to access the Initial Setup Menu.

Subtitle
Press the SUB (Subtitle) Push-button to access the Subtitle menu and the Subtitle icon will appear at the top of the screen.

Angle
If the DVD being played supports the Angle Feature, press the ANGLE Push-button to select the desired video picture angle.

Four Direction Arrows
Press an Arrow direction Push-button to move backward, forward, up or down through an on-screen menu.

Select
Press the SELECT Push-button to confirm and activate a setup option or options indicated by the on-screen icons.

Note: The SELECT push-button is also referred to as “Enter” when working within the Setup Mode.

Top Menu
When a disc is loaded in the player, press the TOP MENU Push-button to access the main DVD Title menu (disc dependent).

Display/Time
Press the DISPlay/TIME Push-button to access various disc times, text information on SACD/CD and audio modes displayed on-screen (disc dependent).

Audio
Press the AUDIO Push-button to access various audio modes displayed on-screen (disc dependent).

REV and FF
Press a ◀ (Reverse) or ▶ (Fast Forward) Push-button to start moving rapidly through a chapter or track on a disc.

Note: Audio level is automatically muted during this operating mode with a DVD disc.

A-B Repeat
Press the A-B (Repeat) Push-button once to establish the starting point of the repeat loop and press the A-B (Repeat) Push-button a second time for the ending point, and that segment of a disc will be repeated continuously.

Search
Press the SEARCH Push-button to activate various search functions including Chapter, Title, Track Group, Time and Marker. For additional information refer to page 30.
Front Panel Displays, Push-buttons and USB Memory Drive

When the indicator is On (Steady), actual communication is occurring between MVP891 HDMI Output and the TV/Monitor’s HDMI Input. When the indicator is just flashing the HDMI Output is selected with no communication occurring between components.

Indicates when the two digits below are displaying the Track or Chapter Number

Indicates when the numeric display is indicating the Total Playing Time of the disc, the current Track Playing Time or the Remaining Playing Time of the disc

Indicates either two or multi-channel sound playback

Indicates when the disc contains multiple viewing angles

Indicates the type of media loaded; BD, USB Memory Drive, CD, DVD, DVD-Audio, or DVD-Video

Indicates when the two digits below are displaying the Group or Title Number

Indicates the Digital Signal being decoded is DTS, DTS-HD or DTS-HD Master

Indicates the Digital Signal being decoded is Dolby Digital or Dolby True HD

Indicates when the two digits below are displaying the Track or Chapter Number of the Disc

Indicates the Digital Signal being decoded is MP3, WMA or AAC

Indicates when the numeric display is indicating the Total Playing Time of the disc, the current Track Playing Time or the Remaining Playing Time of the disc

Indicates the Digital Signal being decoded is Linear PCM (Pulse Code Modulation) or Packed PCM

Indicates when the disc contains multiple viewing angles

Indicates the Audio Signal is being processed using Dolby Pro Logic IIx

Indicates the Repeat Mode selected; Repeat All, Repeat 1Track or Repeat from point A to point B on the disc

Indicates Title Number on the Disc and the Group Number on DVD-Audio Discs

Indicates the random Play Mode is active

Indicates the programmed Track/Group Play Mode is active

Indicates the current Multi-Channel Sound track is down mixed and available at the 2CH Outputs as a stereo audio signal

**Note:** Display items not identified above are for use with other McIntosh Components.
Introduction to the MVP891 Setup Mode

Your McIntosh MVP891 has been factory configured for default operating settings that will allow you to immediately enjoy superb video and high fidelity audio from a Blu-ray 3D Disc. It also reproduces Blu-ray Disc (2D), DVD-Audio, SACDs and CDs with unparalleled sonic purity. If you wish to make changes to the factory default settings perform the following steps, if not proceed to “How to Operate the MVP891” starting on page 26.

Power
The Red LED above the STANDBY/ON switch lights to indicate the MVP891 is connected to AC Power. To Switch ON the MVP891, press the STANDBY/ON Push-button on the Front Panel or the (Power) Push-button on the Remote Control. The STANDBY Red LED will flash during the initialization process. Refer to figures 1 and 2.

Adjustments and Setting changes
All of the adjustments and settings are performed by using the extensive On-Screen Menu System. The On-Screen Menuing System is interactive. The ability to change a menu item setting or have access to a menu item setting (some may be “grayed out”) is dependent on the operational state of the player and the choices made in other menu items. Some menu choices require more than one step to complete. The active selection in a list of options is indicated by a dot located to the left side of the selection, e.g. ●ON. When a disc is playing in the MVP891 and the STOP Push-button is pressed once (the disc playback is paused), some but not all menu items are available for change. To make all of the menu items available for possible change, the playback of the disc must be stopped which requires two presses of the STOP Push-button.

Note: The MVP891 must be connected to a MONITOR/TV either through an A/V Control Center or directly, for setup and use. The Remote Control supplied with the McIntosh MVP891 has several Push-buttons labeled differently than as indicated on the On Screen Menu, please refer to the Instructions in this Owner’s Manual for the correct Push-button.

Checking the Network Connection
The following example will illustrate how to navigate through the built-in MVP891 SETUP Mode and the multiple On-Screen Menus.

One of the many features the MVP891 has is the ability to display On-Screen Videos from "You Tube" via the Internet Network Connection.

Occasionally, McIntosh might make available Firmware Updates for the MVP891. These Updates would be from the McIntosh Computer Server via a Network Internet Connection. The MVP891 will automatically scan for an update when first switched On (with no disc in the tray). If an update is available, the MVP891 will display a message On-Screen for several seconds. For more information about the MVP891 and Network Connections refer to pages 22 and 36.

With the MVP891 connected to your Home Network via a Network Router with an active Internet Access Device connected, perform the following steps:

1. If there is a disc playing in the MVP891 press the STOP Push-button twice.
2. Press the SETUP Push-button on the Remote Control and the last selected Setup Menu Item will appear on the Monitor/TV screen. The figure 3 illustration is of the “General Settings” Menu and options.
6. Press the SELECT Push-button on the Remote Control. The MVP891 will now check for a Network Connection first. Second, it will check for access to the Internet. A window will appear On-Screen indicating “The Network is OK”. Refer to figure 6.

7. Press the SELECT Push-button on the Remote Control and then press the SETUP Push-button to exit the Setup Mode and return to normal operation.

Note: If when the above Connection Test was performed and the message appearing in the Window indicated “Network is FAILED” proceed to Setup Mode, Network Settings on page 22 to resolve the difficulty.

For the vast majority of MVP891 Owners the Default Settings and Suggested Component Connections are all one needs for full enjoyment of movies, still photos, videos and music.

The MVP891 Setup Mode has a number of additional options allowing integration into your Home Theater System. Usually, your McIntosh Dealer and/or Custom Installer uses these additional capabilities.

</table>
| Audio     | Speaker Settings² | 7.1 Channel | 2.1 Channels, 3.1 Channels, 4.1 Channels, 5.1 Channels, 6.1 Channels | The MVP891 performs internal decoding of various Dolby and DTS Digital Signals. The decoded signal is available at the Unbalanced Audio Output 7.1CH Jacks. There are adjustments for Loudspeaker Size, Volume Level and Distance. Select “Test Tone” in the Audio Setting Menu. As each Loudspeaker is highlighted press the SELECT Push-button, use the DIRECTIONAL Push-buttons to select “Size”, “Level” or “Delay” and then make the necessary adjustments following the instructions below.  

*Note: A tape measure and sound pressure meter will greatly assist in making the adjustments.*

**Speaker Configuration:**  
Select the number of channels (Loudspeakers) in the A/V System. The LARGE Setting refers to the Loudspeaker capability for reproducing bass frequencies down to 35Hz within -3dB of the midrange frequencies. If a Loudspeaker can not reproduce bass frequencies down to 35Hz within -3dB of the midrange frequencies it is considered SMALL.  

*Note: Contact your Dealer or the manufacture of the Loudspeaker(s) for additional information.*

**Channel Level:**  
A properly setup Home Theater Surround Sound System should have all Loudspeaker Levels adjusted (when available) to the same starting reference volume level before proceeding. The test signal volume levels of each Loudspeaker in the Listening/Viewing Area, can be determined either by listening or with a sound pressure meter. The level adjustment range is from 0dB to -10dB.  

**Distance:**  
The following Delay Time Adjustments will electronically compensate for different Loudspeaker distances from the preferred Listening/Viewing Area. Refer to figure 20. The delays can be adjusted from 0 feet (0 meters) to 33.5 feet (10.05 meters) for each Loudspeaker.  

*Note: Before performing the Delay Time adjustments, the Loudspeaker Size and Level adjustments need to be performed first.*

²The MVP891 downmixes the 7.1 (6.1, 5.1, 4.1) sound track to a 2 channel signal and is available at the 2CH Balanced and Unbalanced Audio Outputs.
How to Operate the MVP891

Your McIntosh MVP891 has been configured for default operating settings that will allow you to immediately enjoy superb video and high fidelity audio from a wide variety of discs. If you wish to make changes to the default settings, a Setup feature is provided to customize the operating settings using On Screen Menus (refer to the Setup instructions in this manual on page 18). Most operations that can be performed with the Front Panel Push-buttons can also be performed with the Remote Control.

Notes:
1. Some of the MVP891 operating functions such as Disc Languages, Video Angle or Menu Language are active only if the function is supported by data encoded on the disc.
2. Some Blu-ray discs support BD Live downloads, providing various forms of additional information for the disc currently in the player. This additional information is stored in memory. The MVP891 has 1GB of internal memory storage, however the BD Live Information is deleted when the MVP891 is switched OFF. An external USB Memory Drive is supplied with the MVP891 and its memory is not deleted when the MVP891 is switched OFF. For additional information refer to page 6.

Power On
The Red LED above the STANDBY/ON switch lights to indicate the MVP891 is connected to AC Power. To Switch ON the MVP891, press the STANDBY/ON Push-button on the Front Panel or the (Power) Push-button on the Remote Control. The STANDBY Red LED will flash during the initialization process. Refer to figures 30 and 32.

Note: When the MVP891 is switched On, it will take from 20 to 30 seconds for initialization of the internal circuitry to take place before the player is ready to begin operation.

Disc or USB Memory Drive Selection
The MVP891 plays Optical Discs and USB Memory Drives. One can select between the two sources by pressing the SOURCE Push-button once. Press the SOURCE Push-button a second time to return to disc playback. The chart below illustrates the various Front Panel Information Display indications:

<table>
<thead>
<tr>
<th>Playback Media</th>

<td>CD</td>
</tr>
<tr>
<td>USB Drive</td>
<td>00001</td>
</tr>
</tbody>
</table>

Note: Depending on how a given disc has been mastered, the MVP891 Front Panel Display may indicate something different.

How to Load a BD, DVD, SACD or CD Disc
1. Press the OPEN/CLOSE Push-button. The disc tray will slide out allowing a disc to be loaded. Refer to figures 30 and 32.

Note: When the player is in Standby Mode, the MVP891 Power will automatically Switch-On when the OPEN/CLOSE Push-button is pressed.

2. Press the OPEN/CLOSE Push-button and the disc tray will close. The Front Panel Information Display will indicate “LOADING”. Refer to figure 31. If the tray contains a Blu-ray, DVD disc or DVD-Audio, it will start to play without pressing the PLAY Push-button. When the tray contains a SACD or CD Disc, the Front Panel Information Display will indicate the disc type. Press the PLAY Push-button for playback of a SACD or CD disc.

Note: Do to the increase in Video/Audio resolution of a Blu-ray Disc, it will take slightly longer to...
read the increase in disc data before playback will occur.

**How to Play a BD or DVD Disc**

With a disc already loaded into the MVP891, press the ▶ (Play) Push-button on the Front Panel of the MVP891 or Remote Control. Refer to figures 30 and 32.

*Notes: 1. When a Blu-ray, DVD Video or Audio Disc is first started, the Disc’s On-Screen Menu will usually appear allowing for the choice of selections and various Audio/Video Playback Parameters. 2. When the MVP891 is connected to a HDTV not compatible with Blu-ray 3D Discs, an error message will appear On-Screen.*

**How to Play a SACD Disc**

With a disc already loaded into the MVP891, press the ▶ (Play) Push-button on the Front Panel of the MVP891 or Remote Control. The Disc will start playing the first selection of the SACD Layer; this could be either the Multichannel or 2-Channel Tracks depending on the disc contents. By pressing the DISC LAYER Push-button once, the Front Panel Information Display will momentarily display the current layer playing.

To change from the Multichannel Layer to the SACD 2-Channel while the disc is playing, press the DISC LAYER Push-button once to display the current layer “MULTI” and then press the DISC LAYER Push-button a second time to select the “STEREO” Layer.

To change from the Multichannel or Stereo Layer to the CD Layer (or back again), first stop the disc from playing. Press the OPEN/CLOSE Push-button to open the tray and then press the DISC LAYER push-button to select the CD Layer (or Multi Layer/Stereo Layer). Press the PLAY Push-button, after the disc tray closes the MVP891 will read the selected layer and the disc starts to play. Refer to figures 30, 32 and 33.

*Note: The next SACD disc played will default to the SACD Multichannel layer or the SACD Stereo layer if a Multichannel layer is not present on the disc.*

**How to Play a CD Disc**

With a disc already loaded into the MVP891, press the ▶ (Play) Push-button on the Front Panel of the MVP891 or Remote Control. Refer to figures 30 and 32.

**How to Pause a Disc**

This feature allows the temporary stopping of disc playback. Refer to figures 30, 32 and 33.

1. When playing a Disc, press the II (Pause) Push-button to temporarily stop playback.

*Note: After the Pause Feature is activated, with a DVD-Video Disc in the MVP891, each additional press of the II (Pause) Push-button will permit the video to advance one frame at a time.*

2. Press the ▶ (Play) Push-button to cancel pause and resume playing the disc.

**DVD-Video Rapid Frame Advance**

The MVP891 allows for rapid scanning of Blu-ray and DVD Video Frames both forward or backward directions at different speeds.

1. When a disc is playing, press the II (Pause) Push-button to stop playback.

2. Press the ▶ (Fast Forward) or ◀ (Reverse) Push-button to activate the Rapid Frame Advance.

*Note: If the Fast Forward or Reverse Push-button is pressed several times, the speed of the Frame Advance will increase. An On-Screen Icon will appear during the Rapid Frame Advance Mode indicating the advanced speed.*

3. To cancel the Rapid Frame Advance Feature press the ▶ (Play) Push-button.

**Back Track/Chapter**

Return back to the beginning of the Track/Chapter currently playing by momentarily pressing the ◀ (Back) Push-button on the MVP891. Repeated momentary presses of the ◀ (Back) Push-button will allow for rapid selection of the desired previous Tracks/Chapters.
How to Operate the MVP891, con’t

Next Track/Chapter
For each momentary press of the ➤ (Next) Push-button the MVP891 will advance to the next Track/Chapter. Repeated momentary presses of the ➤ (Next) Push-button will allow for rapid selection of the desired Track/Chapter.

Fast Forward or Reverse
Press and release the ➤ (Fast Forward) or ◀ (Reverse) Push-button to search back and forth rapidly through a Track/Chapter on a disc at 2 times normal speed. An On-Screen Icon will appear on the screen and the audio will be muted. If the ➤ (Fast Forward) or ◀ (Reverse) Push-button is pressed and released several times, the speed will increase to a maximum of 7 times normal speed. To return to normal playback press the ➤ (Play) Push-button.

Stop Mode
Press the ■ (Stop) Push-button once to stop disc playback, known as Resume Stop. Press ➤ (Play) and the disc will start playing again from the disc time where Stop was pressed. Press ■ (Stop) twice for a complete stop and return to the beginning of a disc.

Notes: 1. Depending on how a Blu-ray disc has been mastered, pressing the ■ STOP Push-button once, followed by the PLAY Push-button, will return playback to the beginning of the disc (previews, disc setup, etc.) instead of resuming playback of the feature. Instead, use ■ PAUSE followed by ➤ PLAY to stop the movie for a short time.
2. With a DVD Disc, information from the disc will be muted during the Stop Mode, but will resume when the ➤ (Play) Push-button is pressed and playback starts.

On Screen Icon Display
There are On-Screen Icons available to indicate the current audio transport operating conditions and the Audio/Video Status. These On-Screen Icons are accessible by pressing the DISP/TIME Push-button on the supplied Remote Control. Refer to figure 38.

The top row of icons from left to right ---
Transport Mode, Disc Type and format, Titles/Group (current/total), Chapter/Track (current/total), Time (Title, Chapter, Group or Track) (current/total).

The bottom row icons from left to right ---
Number of Audio Choices, Language, Digital Audio Format Type, Number of Channels, Video Format and Resolution.

Once the On-Screen Icons appear, changes to items such as the Track currently Playing, the Chapter Playing, the Group Playing, the Time Indication of the disc or the Audio Mode, etc. may be accomplished. To change from Elapsed Time to Remaining Time use the DIRECTIONAL Push-buttons on the Remote Control. Additionally, the time indicated can be for Title, Chapter, Group or Track depending on the type of disc being played.

By repeated presses of the AUDIO Push-button, selection of the available Digital Audio Formats and/or Languages for the disc playing can be changed.

Video Disc Chapter Selection
Press the DISP/TIME Push-button to activate the On-Screen icon Display. Refer to figure 38. Then press the SEARCH Push-button and use the Right ➤ or Left ◀ Directional Push-buttons to highlight the current chapter number. Press the SELECT Push-button and use the Up ▲ or Down ▼ Directional Push-buttons or the Numeric Push-buttons to select the desired Chapter number. Then press the SELECT Push-button.

DVD-Audio Direct Track Selection
The MVP891 Front Panel Display indicates the Disc Track currently playing. Use the Remote Control NUMERIC Push-button(s) to enter the desired Track Number.

Note: The desired Disc Track may also be selected by using the same method outlined in the previous “Video Disc Chapter Selection”.

DVD-Audio Group/Track Selection
In a similar manner to “Video Disc Chapter Selection” and “DVD-Audio Direct Track Selection”, select either the desired Group or Track.

SACD and CD Direct Track Selection
In a similar manner to “Video Disc Chapter Selection” and “DVD-Audio Direct Group/Track Selection”, select the desired Track.

Marker Search
The MVP891 allows for returning to twelve different locations on a given video disc. Perform the following steps to establish markers:
1. Start playback of the disc.
2. Press the SEARCH Push-button twice. Refer to Figure 39.

3. When the first desired marker location is reached press the SELECT Push-button.
4. As the second desired marker location is reached press the SELECT Push-button again.
5. There are up to twelve possible marker locations available.
6. To return to a specific marker location use the Right or Left Directional Push-buttons to highlight the desired marker and then press the SELECT Push-button.

Note: When the disc is removed and/or the MVP891 is placed in the standby mode, the Marker Locations are deleted from memory.

Repeat Mode
This allows repeating a BD/DVD Chapter, Track or the Title (the entire disc) on a continuous basis. Refer to figure 39.
1. Start playing the disc or the part of the disc you desire to have repeated.
2. Repeated presses of the REPEAT Push-button allows selection of the repeat mode available depending on the type of the disc and how it was mastered. Refer to figure 40 and the On-Screen TV/Monitor.
3. To cancel the previously selected Repeat Mode, press the REPEAT Push-button until the Front Panel Information Display and/or the On-Screen TV/Monitor Display Repeat Symbol is extinguished. Information Display on page 17.

A-B Repeat
This feature works in a similar manner to Repeat Mode except it allows the repeating of a specific disc segment on a continuous basis. Refer to figure 39.
1. Start playing the part of the disc you desire to have repeated.
2. Press the A-B Push-button once to enter A (starting point) and press the same push-button again to enter B (ending point).
3. To cancel A-B REPEAT function press the A-B Push-button once again.

Random Playback
This feature allows for listening to Tracks of a SACD or CD Disc in a Random Order. It also allows for the playback of Tracks in a Group on a DVD-Audio Disc in random order. Refer to figure 40.
1. Press the (Play) Push-button to start Playback of the disc. Then press the RANDOM Push-button to activate random playback of the disc tracks.
2. To cancel the Random Playback press the RANDOM Push-button.

SACD and CD Disc Program Playback Mode
This feature allows for the playback of Tracks of SACD and CD Discs in the desired order.

Note: Programming track selection is performed using the TV/Monitor On-Screen Display.
1. With the desired disc in the MVP891, press the PLAY Push-button to start playback.
2. Press the PGM (Program) Push-button to access the On-Screen Program Mode.
3. For the first Program Track press the SELECT Push-button. Refer to figure 41.
4. Using the Up or Down Directional Push-buttons select the desired Track. Then press the SELECT Push-button to store the Track and to advance to Program step 2.
How to Operate the MVP891, con’t

5. In a similar manner, enter the remaining desired Tracks.

Note: The CLEAR Push-button may be used to delete a selected Program Step.

6. To start playback of the just entered program press the PLAY► Push-button.

Note: To momentarily stop playback press either the Pause II Push-button or the STOP ■ Push-button once. To resume Program Playback press the PLAY► Push-button.

7. To cancel the Program Playback Mode press the STOP ■ Push-button twice.

Search Mode

Depending on the type of disc playing back, the Search Function allows for rapid selection of a location on the disc. Refer to the chart below for disc type and search functions available:

<table>
<thead>
<tr>
<th>Disc Type</th>
<th>BD, DVD-V, DVD-A</th>
<th>SACD, CD</th>
<th>MP3, WMA, LPCM, JPEG, AAC</th>

</tbody>
</table>

To begin search on a disc press the SEARCH Push-button on the Remote Control then select the desired Search Mode from the choices appearing on the screen for the type of disc in the MVP891. Use the DIRECTIONAL and SELECT Push-buttons to enter the desired Search method.

Media Player

The MVP891 has the ability of playing back special types of file formats created primarily on a computer. The ability to successfully playback these files using the MVP891 Media Player is dependent upon using the correct hardware and software. Please refer to the maker of the computer and software publisher to insure proper results.

Notes: 1. The MP3/WMA Audio File Formats use a technique of lossy compression applied to the original audio information, resulting in lower audio quality with a smaller file size. A special version of WMA allows for lossless version of the original audio information.

2. The JPEG Photo File Format is used by a majority of Digital Photo Cameras on the market and the Photos are easily viewed on a variety of consumer products. Some of the Kodak® Picture CDs and Fujifilm® Fujicolor® CDs may also playback on the MVP891.

There are three ways to activate the MVP891 Media Player, insert a CD Disc with data files, select the USB Memory Drive using the Front Panel SOURCE Push-button or press the HOME/PAGE (–) Push-button and select Media Player. Refer to figure 42.

To play a music track located on the USB Memory Drive inserted into the MVP891, perform the following steps:

1. Using the Right► or Left◄ / Up▲ or Down▼ directional Push-buttons, highlight the USB1 Drive and then press the SELECT Push-button. Refer to figure 42.

2. Use the Directional Push-buttons to highlight the “MUSIC” then press the SELECT Push-button. Refer to figure 43.

3. Highlight the desired Track and press the SELECT Push-button to start playback. Refer to figure 44.

4. Once playback has started, the basic transport functions such as Next, Back, Fast-Forward, Re-

---

14“Kodak” is a trademark of Eastman Kodak Company.

16“Fujifilm” and “Fujicolor” are trademarks of the Fuji Company.
verse, Stop, Pause, and Play may be used to access the other tracks located in the folder.

Note: The viewing of photos and videos are also performed in a similar manner using the above steps.

**YouTube**

YouTube is a video file-sharing service operated and managed by YouTube Inc. YouTube and the YouTube logo are the registered trademarks of Google Inc. The content provided by YouTube is independently managed by YouTube, LLC. The content may include information that may be deemed inappropriate.

The MVP891 must be connected to a working Internet Connection in order to watch YouTube. For seamless playback of YouTube Video Content, the MVP891 Internet Connection needs an effective speed greater than 6 MBps for HD Video Content, and greater than 2 MBps for SD Video Content.

Use a Broadband Internet Connection such as Fiber Optics, ADSL, or CATV. The video content may not be displayed correctly, and/or may not be played seamlessly depending upon the usage environment, communication environment, the connection status of the line or on the traffic status of the line. YouTube doesn’t support a proxy connection.

If you have any inquiries about YouTube, contact YouTube through the official homepage http://www.youtube.com. To view YouTube on the MVP891 perform the following:
1. Press the HOME/PAGE (–) Push-button on the Remote Control to access the Home Menu.
2. Use the DIRECTIONAL Push-buttons to highlight the YouTube Logo.
3. Press the SELECT Push-button.
4. Following the On-Screen Instructions and make selections using the Directional and Select Push-buttons.
5. Press the HOME/PAGE (–) Push-button to return to the Home Menu.

**DIVX+**

The MVP891 allows viewing of DivX® Video-On-Demand (VOD) encoded movies/videos via discs or a USB Memory Drive. A computer is required to one time register the MVP891, to download DivX® encoded movie files, and download software to transfer home videos into the DivX® file format.

The MVP891 is a DivX Certified® device and must be registered in order to play purchased DivX® Video-on-Demand (VOD) movies. Refer to page 22 “DivX Registration” to obtain the registration code for this MVP891. It is to be entered during the DivX® registration process. Using an Internet Web Browser on a computer go to: http://vod.divx.com.

Notes: 1. Registration is not needed to play free DivX® movies or videos you create.
2. Registration is required to purchase or rent DivX® movies.
3. A DivX® file recorded with a registration code different from the registration code of this MVP891 cannot be played back.

After this MVP891 is registered and the appropriate DivX® software programs have been installed on the computer, the process of downloading DivX® movies and encoding of home videos can begin. The resulting DivX® files can be burned to a disc and/or copied to USB Memory Drive for playback on the MVP891.

When purchasing or renting a DivX® file through the official site of DivX® Video-On-Demand (VOD) services, the MVP891 registration code will be required.

**Reset of Microprocessors**

**Reset of Microprocessors**
In the unlikely event the controls of the MVP891 stop functioning, the microprocessors can be reset by performing one of the three methods listed below:

**Method One - Reset and retain user settings.**
With the MVP891 in Standby Mode, press and hold in the Front Panel HDMI RES and PAUSE Push-buttons. Release both Push-buttons when the LED above the STANDBY/ON Push-button is extinguished.

**Method Two - Reset and return to default settings.**
With the MVP891 in Stop Mode, press and hold in the Front Panel DISC LAYER and STOP Push-buttons. Release both Push-buttons when “Initialized” is indicated the Front Panel Information Display.

**Method Three**
Remove AC Power from the MVP891 for at least 15 seconds, then reapply AC Power to the MVP891.

**Note:** Some DivX® VOD files are restricted to a certain number of playable times. If your DivX® VOD file has such a limit, the number of playable times is displayed on the DivX® VOD display screen.

When a disc or USB Memory Drive containing a DivX® file is inserted into the MVP891, the built-in Media Player will start. Refer to figure 43. Use the DIRECTIONAL and SELECT Push-buttons to Select the VIDEO Folder and then the desired file to play.
MVP891 Audio/Video Settings and Adjustments

HDMI Mode
The HDMI MODE setting allows the MVP891 Digital Video Output to match the way most movies are shot, namely at 24 frames per second. Not all TV/Monitors are capable of reproducing the video signal at 24 frames per second. Check the TV/Monitors documentation (or contact your dealer) to determine the processing capabilities.

The MVP891 default HDMI MODE setting is “24p OFF”. To activate 24 frames per second output, press the HDMI Push-button until the Front Panel Display indicates “24p ON”. Refer to figure 50 and 53.

HDMI Resolution
The HDMI RES (Resolution) allows matching the MVP891 Digital Video Output to the requirements of the TV/Monitor connected to it. The HDMI RES Push-button switches between the various HDMI settings. Refer to the following chart along with figures 50 and 53.

### Video Adjustments
A MVP891 option allows the adjustment of various video parameters, similar to the adjustments on a TV/Monitor. These custom adjustments can be stored into one of five memory locations. To enter custom settings perform the following steps:

1. Press the PIC ADJ (Picture Adjustment) Push-button on the Remote Control. Refer to figure 51.
2. Use the Up▲ or Down▼ Directional Push-buttons to select Memory 1 Location, followed by pressing the SELECT Push-button to access the Memory 1 Picture Adjust 1 Settings.
3. Use the DIRECTIONAL Push-button to make the various possible changes.
4. To exit the Memory 1 Video Adjustment press the PIC ADJ Push-button.

Note: Any video adjustments just made will automatically be stored in the Memory 1 Settings.

¹ No change available at the VIDEO OUT Jack.
² Effects a 480i signal only and is available at the VIDEO OUT and COMPONENT VIDEO OUT Jacks.
### MVP891 Audio/Video Settings and Adjustments, con’t

#### Audio and Video Settings
The MVP891 has various Audio and Video Settings affecting such things as BD Digital Audio Processing:

Secondary Video/Audio/Subtitle/Subtitle Style for BD Discs mastered with additional features; Audio/Video Sync settings.

To access these settings while playing back a BD Disc, press the MODE Push-button on the Remote Control. Then use the DIRECTIONAL Push-buttons to view status and make changes.

<table>
<thead>
<tr>
<th>Setting Name</th>
<th>Setting Description</th>
<th>Refer to</th>
</tr>
</thead>
</table>
| **BD Audio Mode**  
(Digital Audio Output) | **HD Audio Output** - Select this setting when viewing and listening to the primary information (e.g. the movie) on a Blu-ray Disc. This setting ensures the Dolby TrueHD, DTS-HD Master, etc. Sound Track on the disc is sent, via the HDMI Connection, to the external Audio/Video Control Center for decoding.  
**Mix Audio Output** - Select this setting when viewing and listening to the secondary information (e.g. Picture-in-Picture) on a Blu-ray Disc. This will assure hearing both the Movie Sound Track and the audio from the secondary (Picture-In-Picture). The Digital Audio of this combination (Mix Audio) leaves the MVP891 in a multichannel PCM Encoded Format via the HDMI Connection. |
| **Secondary Video**  
(Picture-in-Picture) | Secondary Video, also known as Picture-in Picture, when available on a Blu-ray Disc (“Bonus View” and “BD Live”) is displayed by the MVP891. The Secondary Video Control allows for selection, when available, from the multiple views that may be available on a given disc. The choices are as follows:  
**OFF** - Switches OFF the Picture-in Picture.  
**1/X** - Displays the first available In-Picture Video.  
**2/X** - Displays the second In-Picture Video.  
**X/X** - Displays the third, fourth, etc. available In-Picture Video. |
| **Secondary Audio**  
(In-Picture Audio) | Secondary Audio, from the Picture-in Picture, when available on a Blu-ray Disc (“Bonus View” and “BD Live”) is outputted by the MVP891. The Secondary Audio Control allows for selection, when available, from the multiple Audio Choices that may be available on a given disc. The choices are as follows:  
**OFF** - Switches OFF the Secondary Audio.  
**1/X** - Selects the first available (In-Picture) Audio.  
**2/X** - Selects the second available (In-Picture) Audio.  
**X/X** - Displays the third, fourth, etc. available (In-Picture) Audio. |
| **Secondary Subtitle**  
(In-Picture Subtitle) | BD Discs with Picture-in-Picture may contain multiple Subtitles to choose from. The choices are as follows:  
**OFF** - Switches OFF the Secondary Subtitle.  
**1/X** - Selects the first available (In-Picture) Subtitle.  
**2/X** - Selects the second available (In-Picture) Subtitle.  
**X/X** - Displays the third, fourth, etc. available (In-Picture) Subtitle. |
| **Subtitle Style** | Selects from the available Subtitle Styles when Picture-in-Picture is available on the Blu-ray Disc. |
| **Audio/Video Sync** | There could be a noticeable difference in time between the picture and sound due to the difference in the Video and Audio Processing time and the type of Video Output Connection used. The choices are:  
**HDMI / Component Video** Output Connections or Composite Video Connection |
Firmware Update

Purpose:
To Update the MVP891 Firmware.

Requirements:
1. A functioning MVP891 Audio/Video Player.
2. An Ethernet Connection between the MVP891 ETHERNET RJ45 connector (using a CAT5 or CAT6 cable) to a Computer Network with router providing Broadband Internet Access or directly to a High Speed Modem with Broadband Internet Access. Refer to page 12 for additional connection information.
3. Internet access supporting DHCP protocol, check with your Internet Service Provider.
   *Note: If your Internet Connection does not support the DHCP protocol proceed to “Network Setup Settings” before starting the Update Process. Refer to pages 18, 19 and 22.
4. An active Video Connection between MVP891 and a TV/Monitor.
5. An active AC Outlet.

Preparing for the Update Process:
With power Off to the MVP891, connect the ETHERNET connector to the computer network/modem.
   *Note: Some Routers/Modems might require to be reset after connection is made to the MVP891.

Perform the following steps:
1. Switch power On to the MVP891.
2. Remove any Disc or USB Memory Drive from the MVP891.
3. The Front Panel Information Display should indicate “NO DISC” at this time. If the display indicates “00001” then press the Front Panel SOURCE Push-button once and then wait until the display indicates “NO DISC” before proceeding.

Before starting the Update Process:
Before proceeding with the MVP891 Firmware Update, please keep in mind the following:
1. The Update process will erase the current firmware inside the MVP891.
2. The MVP891 will not function until a successful Firmware Update is accomplished.
3. The Firmware Update Process will take on average 10 minutes and it could take upwards of 30 minutes or more depending on the speed of the Internet Connection.
4. DO NOT remove AC Power from the MVP891 during the Update Process.
5. DO NOT attempt to stop the Update Process once it has started.
6. DO NOT operate the MVP891 until the Update Process is complete (the Front Panel Information Display will indicate “NO DISC”).

Update Process:
1. Press the SETUP Push-button on the Remote Control. The Front Panel Information Display will indicate “SETUP” and the TV/Monitor will now display the Setup Graphics. Refer to figure 70.

2. Using the DIRECTIONAL Push-buttons first select “System”, then “Firmware Update” followed by “Check for Update”. Refer to figures 71 and 72.

   Figure 70

   Figure 71

   Figure 72

   Figure 73

Note: If figure 73 appears On-Screen the MVP891 was unable to establish a connection with the Internet, try resetting the Routers/Modem and then try again.
3. Press the SELECT Push-button. Refer to figure 74.

![Figure 74](image1)

4. If figure 75 appears On-Screen the MVP891 already has latest Firmware and no update is necessary at this time. If there is a firmware update available press the SELECT Push-button to begin the update process. Refer to figure 76.

![Figure 75](image2)

5. When the Update Firmware Process is complete figure 77 will appear On-Screen. The MVP891 will automatically reboot or Press the SELECT Push-button to reboot the MVP891 now.

![Figure 77](image3)

The Update Process is complete when the Front Panel Information Display indicates “NO DISC”. Resume normal operations at this time.

### Power Requirements

Field AC Voltage conversion of the MVP891 is not possible. The MVP891 is factory configured for one of the following AC Voltages:
- 100 Volts, 50/60Hz at 50 watts
- 110 Volts, 50/60Hz at 50 watts
- 120 Volts, 50/60Hz at 50 watts
- 220 Volts, 50/60Hz at 50 watts
- 230 Volts, 50/60Hz at 50 watts
- 240 Volts, 50/60Hz at 50 watts
Standby: less than 0.5 watt

Note: Refer to the rear panel of the MVP891 for the correct voltage.

### Overall Dimensions

Width is 17-1/2 inches (44.5cm)
Height is 6 inches (15.2cm)
Depth is 16 inches (40.6cm) including connections

Note: When the Disc Tray is opened, the panel clearance required in front of mounting panel is 6-3/4 inches (17.2cm).

### Weight

24 pounds (10.9Kg) net, 40.4 pounds (18.3Kg) in shipping carton

### Shipping Carton Dimensions

Width is 26-1/2 inches (67.3cm)
Depth is 24-1/4 inches (62.2cm)
Height is 11-3/4 inches (29.9cm)
Packing Instructions

In the event it is necessary to repack the equipment for shipment, the equipment must be packed exactly as shown below. It is very important that the four plastic feet are attached to the bottom of the equipment. This will ensure the proper equipment location on the bottom pad. Failure to do this will result in shipping damage.

Use the original shipping carton and interior parts only if they are all in good serviceable condition. If a shipping carton or any of the interior part(s) are needed, please call or write Customer Service Department of McIntosh Laboratory. Refer to page 4. Please see the Part List for the correct part numbers.
